PROFILE

Full-stack product engineer and founder who turns ambiguous workflows into useful, maintainable web products. I work across product definition, responsive interfaces, typed APIs, data models, authentication, integrations, QA, deployment, and handoff. My portfolio spans education, commerce, wellness, travel, and personal productivity products built for real users and practical operating contexts.

CORE STRENGTHS

Product delivery

Product discovery, MVP definition, user journeys, responsive UI, content systems, and admin workflows.

Engineering

TypeScript, React, Next.js, APIs, PostgreSQL, Drizzle ORM, Hono, authentication, and integrations.

Shipping

Automated checks, release evidence, deployment configuration, production boundaries, and maintenance handoff.

EXPERIENCE

Full-stack product engineer — **Independent product work** 2023 — Present · Ethiopia / Remote

- Shipped product workflows across education, commerce, wellness, and travel, including onboarding, authentication, search, content, practice, payments, messaging, progress, and administration.
- Own the path from user problem and data model to typed API, responsive React interface, integration boundary, automated checks, deployment notes, and handoff.
- Document evidence and limitations so a live demo, repository, and release-readiness note are clear about what is verified and what still needs staging or provider validation.

CEO and startup builder — **EthioVista · Deborah · TenaSew · Negus Gebeya** Ethiopia-rooted products

Lead products across travel, education, wellness, and commerce. Shape each venture from a local problem and user workflow through architecture, launch, iteration, and practical product communication.

Web Development Instructor — **Ethio Computer School** Teaching · Digital skills

Taught web development through practical, project-led learning. Delivered instruction focused on building real projects rather than studying theory in isolation. Course page · Course VSL

Marketing Manager — **Gezahegn and Elfinesh Hotel & Resort** Hospitality · Marketing

Built experience in brand positioning, customer communication, and connecting a hospitality organization with its audience and service needs.

EDUCATION & DISTINCTION

Bachelor of Science in Computer Science — **Hawassa University** Ethiopia

Technical foundation in software engineering, systems thinking, product development, and data-oriented problem solving.

Gold medalist — Diploma Practical Theology — **Holistic Bible College** Across Ethiopia

Recognized as a gold medalist in Diploma Practical Theology across all of Ethiopia.

Selected work & technical toolkit

Live product surfaces, documented engineering decisions, and evidence-led delivery.

SELECTED PRODUCTS

Deborah — **Grade 12 Education SaaS** web-cdry.vercel.app

Learning and exam-preparation platform with notes, search, bookmarks, topic practice, timed exams, server scoring, progress, recommendations, achievements, AI study support, provider authentication, payments, and admin workflows. Repository · Release evidence

Negus Gebeya — **Ethiopian marketplace** negus-kappa.vercel.app

Marketplace workflow for listings, seller profiles and trust signals, search, favorites, messaging, orders, Chapa checkout, seller earnings, AI-assisted merchandising, and live-selling route families. Frontend · Backend

TenaSew — **Wellness platform** tenasew.vercel.app

Wellness experience with content routes, preference-aware onboarding, habits, completions, progress, English/Amharic paths, authenticated sessions, and bounded non-diagnostic AI guidance. Repository

EthioVista — **Ethiopia travel platform** ethio-vista.com

Travel discovery experience covering destinations, stays, experiences, transport, guides, trip planning, service journeys, and an AI assistant marked as in development.

TECHNICAL TOOLKIT

Frontend & product

TypeScript · React · Next.js · Tailwind CSS · Framer Motion · Responsive UI

Backend & delivery

Node.js · Hono · PostgreSQL · Drizzle ORM · MongoDB · Docker

Also: Python, FastAPI, Go, Bun, Redis, PHP, Laravel, Java, Spring Boot, C#

EVIDENCE & WORKING STYLE

- Deborah release-readiness report
- Deborah QA test plan
- TenaSew architecture and deployment notes

What I bring

Clear product thinking, practical engineering, honest evidence, and a handoff path that helps a team continue without hidden dependencies.

Open to

Product engineering, MVP definition, platform work, and full-stack collaborations.
